The key points of the month

Point	Where	What it means
Ascendant of the month	24°31' Libra — falls in natal house 3	the tone of the month; the natal house shows the field that lights up: words, studies, siblings, short trips
Moon of the month	house 4 of the return (natal 6)	the emotional need of the month: home, family, roots
Sun in house	11 of the return	where the energy goes: friends, groups, projects
Midheaven of the month	28°06' Cancer — in natal house 12	what shows of you runs through: the inner life, withdrawal, what comes to a close
Lunar phase	waxing gibbous	new = sowing; full = harvest; waning = closing

The lunar return is the chart of the sky at the instant when the Moon comes back to the degree and minute of birth, which happens every 27 days and 8 hours or so: it describes the emotional and practical climate of the "lunar month" from this return to the next. It is calculated for the place where one lives. It is a finer lens than the solar return: it does not change the year, it colours its weeks.

In order of increasing orb; in bold, aspects within 2°. Orbs: conjunction and opposition 8° (10° with Sun or Moon), trine and square 7°, sextile 5°, quincunx 3°; with Ascendant and Midheaven 5° (sextile 3°); with Node, Chiron and Lilith 4° (sextile 3°). A = applying, S = separating.

Your balance in plain words. Every sign has an element (what it is made of) and a mode (how it moves); the count is over the ten planets and the Ascendant, 11 points. A high number (5 or more) shows what prevails in the character, a low one (0 or 1) what is missing or must be sought: it is the background, not a judgement. The full explanation is in the guide "Elements, modes and Lilith".

How to read it: the natal house where a planet of the month falls shows which field of your life that planet animates in these weeks; the aspects (within 2°) show with what harmony or tension.

Bruno Farnesi

This page tells the lunar month in plain words. Astrology describes climates and tendencies, not certain facts; the lines on energy do not replace a doctor.

The theme of the month

The lunar return of 25/08/2026 has the **Ascendant in Libra**, falling in your natal house 3: the month plays out around **words, studies, siblings, short trips**. The **Moon of the month is in house 4** of the return: the emotional need of these four weeks concerns home, family, roots. The Moon of the month is waxing: things get built and grow.

Where the energy goes

The **Sun in house 11**: energy and attention go to friends, groups, projects. The Midheaven of the month in Cancer falls in your natal house 12: what shows of you runs through the inner life, withdrawal, what comes to a close. Your natal Ascendant falls in house 10 of the return: your nature finds room in career, public role, reputation.
